EXPERIENCE

Full Stack Software Engineer | Immersed   **Sep 2022 - Current**
- Implemented server and client-side validation using HTTP requests, the .NET Framework, and SQL Server, providing requested account information to admin users and writing data to the SQL database.
- Built and designed RESTful APIs using .NET Core to connect user-related database SQL scripts with the front-end, storing user input data.
- Integrated authentication implemented with registration and sub-account login flow, as well as interactions between different components across the application.
- Designed and maintained SQL tables and stored procedures in Microsoft SQL Server, utilizing joins and foreign key relationships to ensure accuracy of data storage and queries and reduce redundancy by 20%.
- Designed and developed components using React with pre-made RESTful API integrated with AWS S3 router allowing users to upload vast amounts of files and improving code reusability by 10%.
- Utilized Agile methodologies by actively participating in daily stand-up meetings, code talks and code reviews with peers and lead developers to ensure high-quality code and prevent merge conflicts by 10%.
- Utilized Git and Github for source control and repository management to implement code changes.

Property Manager | Realtyworld Group   **Jan 2021 - Jan 2022**
- Enforced and maintained all lease provisions as necessary, communicated with tenants, and prepared necessary documents by email, text and written notices.
- Coordinated property management and maintenance of over 100 commercial and residential units, ensuring proper handling of maintenance issues resulting in a 15% increase in productivity.
- Created market analysis reports using Microsoft Excel and advised Landlords on future advertisement prices.
- Managed tenant information in the database, screened applicants based on credit reports and advised Landlords on lease approvals, reducing risk of faulty tenants by 100%.
- Conducted regular audits of managed properties, resulting in a 15% increase in property income.

Healthcare specialist (Combat Medic) | United States Army   **July2017 - Jan 2021**
- Accountable for inventorying all groups of equipment costing over millions of dollars and expendables necessary to treat casualties/ soldiers during field training exercises to ensure medical readiness.
- Managed well- being and productivity of soldiers, resulting in a 10% increase in productivity by completing battalion ordered tasks.
- Instructed CLS (Combat Life Saving) classes to a brigade of 3000 soldiers to increase medical readiness by 15%.
- Maintained database within the hospital setting, to update necessary patient information reducing redundancy and actively supporting soldiers.
